

IEEE Wireless Communications and Networking Conference 2019

15-18 April 2019 // Marrakech, Morocco

IEEE WCNC is one of the main venues for researchers, industry professionals, and academics interested in the most advanced and recent contributions to wireless communications, especially regarding the design and development of wireless systems and networks. Sponsored by the IEEE Communications Society, IEEE WCNC has a long history of connecting industry, academia, and regulatory bodies. In 2019, other than mesmerizing its visitors by its beauty, Marrakesh as a major city of Morocco will become the premium venue of the wireless by hosting WCNC'19. The conference will include technical sessions, tutorials, workshops, and technology/business panels. You are invited to submit papers in all areas of wireless communications and networks. Potential topics include, but are not limited to:

Track 1: PHY and Fundamentals

- Channel modeling, characterization and estimation
- Modulation, coding, diversity, equalization, synchronization
- OFDM, multi-carrier modulation, waveform design
- Interference modeling, management, cancellation and alignment
- PHY strategies for low-rate, sporadic and asynchronous communications
- MIMO, massive MIMO and cloud-RAN
- Cooperative, device-to-device and multi-hop communication
- Cognitive radio, spectrum sensing
- Content caching and storage in wireless networks
- PHY layer design for cellular, wireless LAN, ad hoc and sensor networks
- Energy efficient and energy harvesting PHY layer design
- Joint information and energy transmission
- PHY layer security and privacy, ultra-wideband, mmWave and sub-THz communication
- Information-theoretic aspects of wireless communications
- Signal processing for wireless communications
- Molecular and nano communications

Track 2: MAC and Cross-Layer Design

- Wireless MAC protocols for 5G: design, analysis, and optimization
- Cognitive and cooperative MAC
- MAC for mesh, ad hoc, relay and sensor networks
- Scheduling and radio resource management
- Cross-layer MAC design
- Software defined radio, RFID MAC
- QoS support and energy efficient MAC
- MAC protocol for energy harvesting wireless networks
- MAC design for multiter cellular/small cell networks
- Multiple access in machine-to-machine communication
- MAC for cloud-RAN
- MAC protocols for molecular and nano networks
- MAC protocols for mmWave networks
- Full-duplex MAC design
- Cross-layer design for massive MIMO and multiuser MIMO networks

Track 3: Wireless Networks

- Software-defined mobile/wireless networks
- Wireless Network Functions Virtualization
- Virtual network management and orchestration
- Mobile cloud
- Fog computing and networking
- Mobile Edge Computing
- Mesh, relay, sensor and ad hoc networks
- Routing in wireless networks
- Cognitive radio and networking
- Resource management and optimization
- Big Data enabled Self-Organized Networking
- Mobile big data and network data analytics
- Integrated Wireless/Optical networks
- Mobility, location, and handoff management
- Multimedia QoS and traffic management
- Wireless broadcast, multicast and streaming
- Congestion and admission control
- Wireless network security and privacy
- Mobile social networks
- Wireless network measurements and characterization

Track 4: Emerging Technologies, Architectures and Services

- Mobile/Wireless network support for vertical industries
- Adaptive content distribution in on-demand services
- Context and location-aware wireless services and applications
- User-centric networks and adaptive services
- Wireless body area networks and e-health services
- Intelligent transportation systems
- Dynamic sensor networks for urban applications
- Wireless emergency and security systems
- Ultra-reliable communication
- Enabling regulations, standards, spectrum management
- Hybrid licensed/unlicensed spectrum access schemes (e. g. licensed-assisted access)
- Technologies, architectures and enabling business models for rural communications
- Satellite-based mobile access and backhaul
- Hybrid satellite-terrestrial networks
- Full duplexing
- Joint access and backhaul schemes
- Testbed and prototype implementation of wireless services

CALL FOR PANELS

Panel proposals are also solicited on technical, business and policy-related issues and opportunities for the wireless communications industry.

Accepted and presented papers will be published in the IEEE WCNC 2019 Conference Proceedings.

IMPORTANT DATES

Paper Submission Deadline: September 25, 2018

Notification of Acceptance: December 25, 2018

Camera-Ready Submission: January 25, 2019

Panel Proposals: October 15, 2018

Tutorial Proposals: October 15, 2018

Workshop Proposals: October 15, 2018

EXECUTIVE GENERAL CHAIR

- Prof. Tarik Taleb, Aalto University, Finland

TECHNICAL PROGRAM COMMITTEE Co-CHAIRS

- Prof. Muriel Médard, MIT, USA
- Prof. Ross Murch, The Hong Kong University of Science and Technology, Hong Kong
- Prof. Nelson Fonseca, The State University of Campinas, Brazil

STEERING COMMITTEE CHAIR

- Prof. Khaled B. Letaief, Hong Kong University of Science & Technology, Hong Kong
